

AMIDOFA 250SC

Azoxystrobin 250g/l

DESCRIPTION: AMIDOFA 250SC is a broad spectrum contact and systemic fungicide for the control of botrytis, rust, anthracnose, angular leaf spot, ascochyta, powdery and downy mildew in roses, carnations, statice, peas and beans.

MODE OF ACTION: AMIDOFA 250SC acts by inhibiting spore germination in early stages of fungal development. It is also active against post-germination stages of the life cycle of most fungi.

APPLICATION RATES

Crop	Disease	Rate/Ha	Rate/20Lt
Roses	Botrytis, Downy mildew	750ml	15ml
Carnations	Rust	750ml	15ml
Brassicas	Powdery mildew	750ml	15ml
Statice	Botrytis	750ml	15ml
French Beans/Peas	Botrytis, Ascochyta, Anthracnose, Rust, Angular leaf spot	750ml	15ml

Available: 50ml, 100ml, 250ml, 500ml, 5lts, 20Lts

PRE-HARVEST INTERVAL: 14 days in French beans

RE-ENTRY PERIOD: 24 hours.

APPLICATION METHOD: AMIDOFA 250SC is foliar applied by spraying using 1000 liters of spray mixture per hectare.

APPLICATION TIMING: to achieve efficient control, AMIDOFA 250SC should be applied at the onset of disease. Repeat after 10 days and use upto a maximum of 3 times per season.

PREPARATION OF SPRAY MIXTURE: Fill spray tank with half the amount of required water. Add required amount of AMIDOFA 250SC and fill the water to the required level. Agitate to ensure thorough mixing.
